Abstract

Islam is not just a religion that you bound it only to a personal level, and specify it to worldly needs. We have to acknowledge this fact that Islam is not the name of few acts of worship or rituals but it is a complete way of life sent by Allah almighty, the foundation of which is 5 departments: Believes, worship, society, dealings, and behavior.

The method of Allah SWT is always this that when he encourages perfecting your adorations in the same manner he encourages to perfect your behavior and dealings in society according to the teachings of Islam, therefore Allah SWT says in the Quran:

"O people! Eat what is Halal and purified for you in the Earth, and don't follow the Footsteps of the Devil because no doubt that he is your open enemy". Surah Baqarah: Ayah # 168

In this ayah Allah SWT is enforcing the halal Provision.

These days, the importance of halal is left to be eliminated. Theft, robbery, bribery, Muslims consider them as a sin. But the prohibited cases of commission are not considered as a sin. The many forms of commission or corruption are going on in our society. In this short article, I cannot cover all of them. But I wanted to write about the commission of a purchase agent, because this is a basic problem of corruption in our country.
