### **Abstract:**

*Now a days banking is a basic need of human beings which was not before this era. It is due to abundance of the wealth. At the banking has different shapes and types. Due to the plenty of wealth greed entered in the human being, he wanted to be wealthy without any exertion and wanted to occupy the wealth of others by unfair means.*

*The bankers of those days started getting interest on their money given to poor as loan. and so on the business of interest took its place in the society. It is said Greed is curse so in the period of Islam when the business of Interest was in its full swing among Arabs and Jews of Madina Interest was made prohibited and unlawful. Most of the Muslims wanted to get their interest on the money given before this order. So Allah has to announce a War against those persons.*

*In this business of interest Muslims are also involved so the Think tank of Islam wanted to save Islamic society from this curse. That is why that need of Islamic banking was realized. Then it was established and started in the Muslim countries. But due to being more effective it is started in non Muslim countries also on trial bases. It sees that the future of Islamic banking is glorious. It is the need of hours.*
